Art Unit: 1643

Claims 242, 250, 277, 290, 298, 304, 318, 330, 337, 349, 356 and 360 have been cancelled.

New Grounds of Objection

Claim Objections

10. Claim 309 is objected to because of the following informality: at step 7 within the claim contains the term "the" twice. Correction is required.

New Grounds of Rejection

Double Patenting

11. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Art Unit: 1643

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

12. Claims 241, 244, 245, 248, 249, 252, 253, 256, 265-276, 278-289, 291-297, 299-303, 305-317, 319-329, 331-336, 338-348, 350-355, 357-359 and 361-370 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 7,655,411 B2 (issued February 2, 2010). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim set of both documents share the active method step of measuring an individual's plasma level of thrombospondin fragment or fragments with a binding agent, wherein the fragment sizes are the same in order to detect the presence and/or clinical course of a neoplastic disease.

Applicant asserted previously that a terminal disclaimer submitted in application 10/419,462 that corresponds to said patent should obviate the pending rejection, see Remarks submitted April 27, 2009, page 7. The Examiner prematurely withdrew the rejection in the Final Action mailed January 20, 2010. Applicants need to submit a terminal disclaimer in the present case to obviate this pending rejection.
